

## Care Net Peninsula

**Care Net Peninsula** is a non-profit organization on a mission to bring practical help and hope in JESUS to women facing pregnancy decisions. For nearly 35 years we have served Newport News, Hampton, Williamsburg, Poquoson, Gloucester, Yorktown and James City County.

All of our services are free and confidential to our clients. We offer pregnancy verification, limited obstetrical ultrasounds, options counseling, parenting education, adoption and medical referrals, and material support for mom and baby.

We want to reach **women** and **couples** considering abortion and empower them to choose life. We rely completely off your generous donations and volunteers to come work with us. Visit our website [www.cnpeninsula.org](http://www.cnpeninsula.org) to help us in this life-saving work.

Women bring us their unplanned pregnancies – unsure of what to do; full of the fear that their unplanned pregnancies will give birth to unplanned babies. With the culture society screaming in their ears, it's hard to imagine anything other than an inevitable end – unplanned babies will ruin their lives.

BUT when women find **Care Net Peninsula** and get the help and hope they need...their decision can be a life changing event for them and their baby when they choose life.

In the back of your mind, you might be wondering: then what?

As you support **Care Net Peninsula's** mission to serve moms and save babies you may hit a wall when trying to envision what happens after her pregnancy decision. After the birth of the baby and as the reality of that choice weighs in fully – with a new life sleeping in the next room we are helping new moms adjust to being a parent and reentering society norms.

Pro-abortion advocates weave a pretty dismal story – a woman's success and happiness hinges on her opportunity to abort her child. Without abortion, how will women survive?

But here at **Care Net** we are not storywriters. We're story-tellers and tell true stories. Stories that you – our donors – help our clients create.

We are privileged to see these women you help – months and years after they choose life for their babies with incredible, successful...happy women. Raising their children! Working hard! They are proud, powerful women who defy the loud lie that abortion saves women!

At **Care Net Peninsula**, our services start with a moment – that first call to our clinic. And then there are more moments – that first connection with an advocate, that first peek at the ultrasound screen, that first conversation with one of our Registered Nurses.

Every single life-changing event starts with one moment. But these moments turn into lifetimes. Lifetimes not doomed to failure because a woman chose to protect her unborn child. Women **NOT** living lives full of regret about what could have been – if only they aborted.

Now, we find women fully aware that they saved themselves when they saved their babies. They realize that life is precious and given by GOD.

When you are part of the [\*Care Net Family\*](#), you empower women to understand the truth. You help women see a real future – one that does not need to include an abortion procedure.

You see, the abortion industry may need women, but women do not need an abortion. Amen!

[When you support to Care Net Peninsula](#), you become part of every one of these life-changing moments. Your generous support – is providing pregnant women with the help and hope they need to choose life – turning these life changing moments into successful lifetimes...for babies and moms! Come Join Us!

One way you can support **Care Net Peninsula** is to take **Baby Bottles** that we provide and fill them with loose change, paper money, or checks...whatever is best for you. Surprisingly, loose change can add

up to larger sums of money especially if several people or families participate. A representative from your organization can pick up a milk crate with 25 empty baby bottles in it. Again, participation is strictly voluntary! We sure appreciate everyone's effort in supporting **Care Net Peninsula!**

An upcoming event that **Care Net Peninsula** is looking forward to is in October with Eric Metaxas as our guest speaker. A dinner is planned. Organizations can reserve a table at the Hampton Convention Center and can share information about their organization. The topic for this year's event is: **"The only fight that is lost is that which we give up!"** More information forthcoming.
